**Course Prerequisites**

PREREQUISITE: MATH 1000.03, MATH 1010.03, classic calculus or equivalent, and permission of the instructor.

**Course Objectives/Learning Outcomes**

Students should be able to derive and explain the equations describing the static and dynamic states of the ocean, and apply these to important problems of oceanography and climatology. Successful students will be able to tackle unfamiliar problems with insights gained from understanding, not memorization.
